

```

struct example {
    char *
    int i;
    str * s;
};

#define EXAMPLE_ADDRESS 0x...

A = x;
A = i;
str = s;
    
```

Basic setup of STM32

address - datasheet offset

```

setup_something (struct example, parameters)
{
    setup...;
}
    
```
